## GENOME ORGANIZATION AND EXPRESSION IN PLANTS

Book Condition: New. Publisher/Verlag: Springer, Berlin | In the summer of 1976 a successful workshop on nucleic acids and protein synthesis in plant systems was organised in Strasbourg by Jacques Weil and Lawrence Bogorad. The participants in the workshop, were, without exception, excited both by the quality of the work discussed and by the rapid progress being made in several areas of genomic analysis and expression in plants. It also became apparent that there was a need for an international assembly of this sort at regular intervals. These workshops not only encourage stimulating discussion and constructive thinking but also result in increased collaboration and productive liaison between laboratories with common interests. Hence a ten-day advanced studies institute course was organised in Edinburgh from 11-21 July 1979, and in this volume we have published the contributions given by the invited speakers. The subjects discussed covered most areas of plant molecular biology and the lecturers were asked to balance a review of their chosen subject with the results of their own recent research and likely future advances. Probably the most important technical advance since the previous meeting of this group in Strasbourg, was the application of restriction enzyme analysis and cloning techniques. This is illustrated in many of the published lectures and was the basis for many of the more informal discussion sessions. | &apos;Organization of the Nuclear Genome.- Contrasting Patterns of DNA Sequence Organisation in Plants.- On the Evolution and Functional Significance of DNA Sequence Organisation in Vascular Plants.- Plant DNA: Long, Pure and Simple.- The Evolution of Plant Genome Structure.- Cloning and Analysis of Plant DNA.- Chromosome and Gene Structure in Plants: A Picture Deduced from Analysis of Molecular Clones of Plant DNA.- A Model for a Molecular Cloning System in Higher Plants: Isolation of Plant Viral Promoters.- Transcription...
