Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Retail Organization and Accounting Control With the firm belief that Accounting may eventually become a science, and that the knowledge accumulated through experience and experiments is essential to the furtherance of such science, I have written this book out of my accumulated knowledge and experience for the benefit of retailing establishments and the accounting profession. We are living in a world of specialization and in writing this book, I have treated in its entirety retail control. All the systems have been installed with very large organizations to test their worth, prior to placing them before Retailers and the Accounting world in this volume. No consideration whatever is given to manufacturing, excepting where it is necessary to draw a comparison. The department store, the specialty shop, and retail store of any description are within the book's scope. I have eliminated as far as possible technicalities, that the value of this volume may be enhanced as a textbook and wherever it may be required for a complete installation of a department store system. I have long felt the need of a textbook on department store procedure, and have endeavored to render my book useful by its treatment of accounting, management and systems. Theory is entirely eliminated. Practical application and experience are its governing features. The management of stores very often is confronted with perplexing problems. It endeavors to obtain knowledge of methods employed in other establishments. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
