

The Coming Population Crash: And Our Planet's Surprising Future

By Fred Pearce

Beacon Press, United States, 2011. Paperback. Book Condition: New. 222 x 150 mm. Language: English . Brand New Book. A leading environmental writer looks at the unexpected effects--and possible benefits--of a shrinking, graying population. Over the last century, the world's population quadrupled and fears of overpopulation flared, with baby booms blamed for genocide and terrorism, and overpopulation singled out as the primary factor driving global warming. Yet, surprisingly, it appears that the population explosion is past its peak--by mid-century, the world's population will be declining for the first time in over seven hundred years. In *The Coming Population Crash*, veteran environmental writer Fred Pearce reveals the dynamics behind this dramatic shift and describes the environmental, social, and economic effects of our surprising demographic future.

Reviews

It becomes an awesome publication that I actually have actually read. It really is written in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
