RUBES, 2012. Rústica. Book Condition: Nuevo. Dust Jacket Condition: Nuevo. 01. La biodiversidad es la realidad biológica que más nos fascina. Aparece como una fuerza de renovación vital frente al uniformismo, a la monotonía. La vida, que muestra toda su potencia y exuberancia creativa al diversificarse y generar más especies de las que podamos clasificar ejerce, a cambio, la tiranía de la extinción sobre sus criaturas. La biodiversidad no hace prisioneros. Es una dura ley que alimenta los árboles filogenéticos, pero que devora a individuos y especies. . Este libro no es una biografía de los seres más adaptables, ni una cronología de las devastaciones remotas. Es un manual ilustrativo de lo que significa sobrevivir en la biodiversidad. A pesar de los cataclismos. A pesar de la presión que el ser humano ejerce sobre el resto de los seres vivos. A pesar del comercio de especies, de la sobreexplotación de recursos naturales y de la polución. Un manual que describe la urgencia de preservar la riqueza biológica, so pena de tener que releerlo en los confines del Paraíso, quizá mientras aguardamos nuestra propia extinción. LIBRO.
