Plural Publishing Inc, United States, 2005. Paperback. Book Condition: New. 249 x 175 mm. Language: English . Brand New Book. Designed as a complete course for undergraduate and graduate students of speech-language pathology and linguistics Features worked examples with each chapter Includes appendices giving all the symbols and transcription conventions utilized This book is designed as a course in the phonetic transcription of normal and disordered speech. What differentiates this book from existing approaches to phonetic transcription and conversational analysis is that it concentrates on linking together layers of detail to result in a complete record for the entire range of transcribable behaviors. Muller s book represents the first attempt to amalgamate differing methods to give phoneticians and clinicians a transcriptional tool kit, thus allowing them to generate a rich description of their data. This approach results in a variety of layers of transcription, all or some of which are available to the clinician or researcher faced with the task of transcribing speech. The layers include a base, orthographic layer; segmental and suprasegmental phonetic layers; a gaze and gesture layer; a layer for marking aspects of discourse (e.g., overlap); and finally, a layer for highlighting behaviors of specific clinical interest...
