Date :2009-10-01 version 1. Li Bin. editor of the Experimental Physics contains Introduction. measurement error and data processing. basic experimental. design of experiments. physics experiment preparation knowledge of five parts. Content includes mechanics experiments. thermal experiments. experimental electromagnetic. optical experiments and experiments in modern physics. University physics experiment can be used as ordinary institutions of higher learning university physics experiment teaching materials to use. but also for related technical officers. Contents: Chapter 1 Introduction Section physics experiment of the role and purpose of the main aspects of physics experiments II. III experimental basic safety codes and experimental methods and experimental methods of measuring the basic experimental technique of Section IV Chapter measurement error and error of measurement and data processing section II the basic knowledge of the uncertainty of indirect measurement of the third quarter results of computing the expression and transmission of uncertainty fourth digits V Section VI experimental data approach the physical general style lab reports. processing of data instance mapping method based Experiment one chapter the basic mechanics of using the experimental two measuring instruments using air track validation Newton's Second Law Experiment 3 measured torsion moment of inertia of an object Note: The moment of inertia tester profile experiment four tensile elastic modulus determination of Young's experiment five experiments to measure the linear expansion coefficient of the scope of the regulation and use of six experiments seven linear and nonlinear resistance of the resistor current - voltage characteristics of eight experiments with simulation experiments nine potential electrostatic field mapping deviation of experiments ten experimental eleven Wheatstone bridge with a Hall-effect determination of the axial magnetic flux density distribution of...
